For Immediate Release

Happy 1st Birthday to "Xiao Xiao" and "Lei Lei"!

"ANIA The Giant Panda (Ueno Zoological Gardens Original Model)"

On sale within the Gardens and on Tokyo Zoo Shop from Thursday, June 23, 2022, the twins' birthday!

TOMY Company, Ltd.

TOMY Company, Ltd. (Representative Director, President & COO: Kazuhiro Kojima, headquarters: Katsushikaku, Tokyo) will release as a new product of its hand-held-sized "ANIA" series of animal figures equipped with action gimmicks, under the supervision of the Ueno Zoological Gardens, Tokyo Zoological Park Society, <u>"ANIA</u> <u>The Giant Panda (Ueno Zoological Gardens Original Model)</u>" (SRP: JPY 2,200/tax included), from Thursday June 23, 2022, the first birthday of "Xiao Xiao" and "Lei Lei," at two gift shops inside Ueno Zoological Gardens and on the Tokyo Zoological Park Society's official online shop, Tokyo Zoo Shop (tokyo-zoo-shop.jp).

<u>"ANIA The Giant Panda</u> (Ueno Zoological Gardens Original Model)"

The "ANIA The Giant Panda (Ueno Zoological Gardens Original Model)" is an ANIA model of Ueno Zoological Gardens' giant panda, "Shin Shin," and her children, "Xiao Xiao" and "Lei Lei." For the ANIA series, this is the first commercialization of a zoo's original model and the first commercialization of animals with nicknames.

"Shin Shin" has a large, slightly heart-shaped snout and a raised corner of her mouth. The black-and-white parts of her body, the dirt on her body, the paw pads and fur color on the soles of her feet, and the claws on her feet, which stand out even from outside view, have all been recreated to meticulous detail to make her look as real as possible.

The twins "Xiao Xiao" and "Lei Lei" have slightly reddish beige fur, and like "Shin Shin," the claws on their feet have also been recreated. The heels of "Xiao Xiao" and "Lei Lei" are white because they have white fur on the inside of their heels. The black parts around the eyes are not noticeably different between the two animals, but the position and angle of the black parts show the difference between the two animals' faces. The back of "Xiao Xiao" has a green line for individual identification, and we have also focused on making the line look as realistic as possible. A portion of the proceeds from the sale of this product will be donated to the giant panda conservation support fund "SAVE the PANDA" (www.ueno-panda.jp/support).

Since its launch in June 2013, the "ANIA" series has shipped more than fifteen million units (as of September 2021), including products sold in sets, in Japan and overseas as popular figures. This product was initiated in response to the zoo's closure and restrictions on admission to the zoo last year, with the hope of creating a product that would deliver the charm of the giant panda twins to the many people who have been looking forward to watching them grow up.

In addition, a diorama exhibit of the product will be displayed in the park's gift shops. Going forward, "ANIA" will continue to collaborate with zoos, aquariums, museums, and other institutions nationwide (*1) to develop products that deliver the appeal of various living creatures.

*1 To date, in collaboration with Fukui Prefectural Dinosaur Museum, we have released "ANIA Fukui Saurus Fukui Prefectural Dinosaur Museum model" and "ANIA Fukui Raptor Fukui Prefectural Dinosaur Museum model" (SRP: JPY 990 each/tax included), and the general model "ANIA AL-19 Fukuiraptor," etc. (from July 2020).

Planning:	GCG LLC

What is "ANIA"?

The "ANIA" series was launched in 2013 and features a range of hand-held size animal action figures with the gimmick of being able to be moved and played with. The products are designed as a "3D animal picture book" to stimulate intellectual interest in children who want to know more about the characteristics and types of different animals and as items that parents and children can play with together. These toys are created not just for displaying but based on the concept of animal action figures to be moved and played with. Their hand-held size, movable gimmick action feature and detailed molding have made them

popular, and to date more than fifteen million units have been sold in Japan and overseas (series total; as of September 2021). The "ANIA" series toys have also received "Guide Dog Mark" (*1) certification as "accessible-design toys" (*2) that children with visual disabilities can enjoy. The series won the Grand Prize in the Accessible-Design Toys category at the 2013 Japan Toy Awards.

(1) Hand-held size: Designed to fit perfectly in the palm of a child, the "ANIA" series toys are easy to handle and play with. (2) Movable gimmick action feature: All "ANIA" series toys feature a movable part that is characteristic of each animal (e.g., a lion that opens its mouth, an elephant that sways its trunk, a giraffe that moves its neck, and a lesser panda that moves its tail). Children can intuitively understand the characteristic part of each animal and play with them by recreating typical poses such as a giraffe reaching up to eat leaves from a tree or a crocodile opening its jaws to catch prey.

(3) Detailed molding: All animals in the "ANIA" series are designed without sharp protrusions to ensure safety of play and are shaped to be appealing to children, in addition to which close attention to detail is paid to coloring and molding to recreate the look of the animal's skin, feel of its fur, shape of its limbs, appearance of its paw pads, etc.

*(1) The "Guide Dog Mark" certification is given to "accessible-design toys" that children with visual disabilities can enjoy.

*(2) "Accessible-design toys" are toys made and sold for the general market that children with and without visual disabilities can enjoy playing with.
